
SUMMARY

Global marketing and business strategy professional with 7+ years driving B2B revenue growth across North America, Europe, and Asia. Owned product launches, positioning, differentiation, and lifecycle management for a global semiconductor portfolio, driving 140% revenue growth over three years. Owned a cooling filter line supplied into MRI machines, including pricing, contract terms, and the key account relationship. Consulting experience in market sizing, competitive assessment, and U.S. market entry, plus cross-market analysis for life sciences software. Trilingual in English, Japanese, and Mandarin.

EDUCATION***Master of Business Administration (MBA)*****Aug 2024 – Jun 2026**

University of California, San Diego, CA

Bachelor of Arts, Economics**Sep 2016 – Apr 2019**

Temple University Japan Campus, Tokyo, Japan

PROFESSIONAL EXPERIENCE***MBA Marketing Intern, BIOVIA, Dassault Systèmes, San Diego, CA*****Jun 2025 – Present**

Biotech and pharmaceutical software industry

- Mapped the competitive and cross-market landscape across life sciences, materials science, and informatics segments, turning competitor positioning, white space, and unmet needs into a segment prioritization view used in annual marketing planning and GTM targeting.
- Directed end-to-end strategy for global campaigns and industry events (trade shows, conferences, webinars), covering messaging, vendor and budget management, and timelines; drove cross-functional alignment with sales and technical stakeholders to translate technical input into compelling messaging and convert event contacts into qualified pipeline.
- Developed Excel-based performance dashboards tying campaign and event spend to pipeline contribution; findings informed reallocation of budget toward higher-yield channels and supported an increased allocation for the following cycle.

Strategy Consultant (Rady Action Project), Intel Corporation, Santa Clara, CA**Mar 2025 – Jun 2025**

Semiconductor / robotics industry

- Sized the global physical AI and robotics opportunity across North America, Europe, and Asia to identify where AI-driven demand inflects.
- Led primary and secondary research, translating fragmented expert input into a structured view of adoption barriers: capex, data availability, safety certification, and regulatory lag.
- Recommended a partnership-led entry strategy targeting niche robotics startups over general-purpose humanoids; presented to Intel Corporate Strategy leadership, who adopted the recommended direction.

Global Marketing & Business Strategy Manager, Moretec, Inc., Tokyo, Japan**May 2022 – Jul 2024**

Semiconductor industry (including cooling filter components supplied into MRI machines)

- Grew revenue 140% over three years, owning international revenue planning and market strategy across North America, Europe, and Asia, and building the segmentation, positioning, differentiation, and demand-generation plan behind it.
- Drove marketing input to new product development (NPD), partnering with R&D and engineering to translate market requirements and unmet needs into product specifications and the innovation roadmap.
- Launched products across North America, Europe, and Asia, taking plans from concept through commercialization, including timelines, deliverables, and alignment across stakeholders.
- Owned the cooling filter product line supplied into MRI machines, launching a new product, setting pricing and contract terms, and managing the key account relationship with the primary customer in Asia.
- Managed portfolio health through lifecycle management, including repositioning and sunseting decisions on existing products.
- Led market entry and channel expansion into new regional accounts, combining competitive analysis and customer insight to refine pricing and value propositions.
- Delivered quarterly performance analysis and strategic recommendations directly to the CEO, including marketing budget allocation across regions and channels.

Global Marketing & Business Strategy Associate, Moretec, Inc., Tokyo, Japan

Apr 2018 – Apr 2022

- Executed global B2B campaigns across Japan, China, the U.S., and Europe, driving 30% revenue growth through data-driven customer acquisition.
- Exceeded sales targets by 25% by rebalancing channel mix, refining value propositions, and tightening lead qualification across trade shows, digital, and outbound.
- Coordinated with engineering, manufacturing, and quality on joint customer visits and technical support, resolving spec, quality, and supply issues affecting key accounts.
- Equipped regional sales teams with enablement toolkits, training programs, and messaging that drove adoption.
- Built the marketing KPI tracking that became the basis for regional GTM planning, working cross-functionally to optimize funnel performance through KPI and ROI analysis.

PROJECTS

AI-Powered Portfolio Website

Feb 2025 – Present

- Designed and built a responsive personal portfolio website using AI-assisted development, with custom sections for professional experience, projects, and technical skills.
- Applied prompt engineering and AI-assisted workflows to accelerate development and refine UI/UX through iterative testing.

Deep Tech & Industrial Policy Strategy Project, UC San Diego Rady School of Management

Jun 2025 – Sep 2025

- Analyzed how U.S. industrial policy, including the CHIPS Act, Inflation Reduction Act, and Stargate Project, is reshaping capital flows, M&A activity, and private equity investment across Deep Tech, AI, and advanced manufacturing, with a financial advisory firm and UC San Diego faculty.
- Identified emerging investment opportunities, supply chain bottlenecks, and infrastructure priorities to support strategic decision-making.

Market Entry Consulting Project, Bzigo, San Diego, CA

Mar 2025 – Apr 2025

- Developed the U.S. market entry strategy for an AI-powered mosquito detection device, building a bottom-up market model across segmented consumer and commercial buyer types to size the addressable opportunity.
- Defined pricing and channel economics for direct and distributor routes and sequenced a phased B2C-to-B2B rollout to enter through consumers before scaling into commercial accounts.
- Strategy adopted by the client, which entered the U.S. market following the engagement; awarded 1st place among MBA consulting teams for strategic innovation.
